DETAILED ACTION

Response to Amendment

1. The amendments to Claim 22 in the After Final amendment dated 2/10/04 are acknowledged and accepted. In view of these amendments, the objections to the claims in Section 5 of the Office Action dated 1/27/04 are respectfully withdrawn.

Response to Arguments

2. The Applicants' arguments, see in particular Pages 7-10 of the After Final amendment dated 2/10/04, with respect to Claim 22 have been fully considered and are persuasive. The rejections of Claims 22-26, 29-32 in Sections 7-12 of the Office Action dated 1/27/04 are respectfully withdrawn.

Election/Restrictions

3. This application is in condition for allowance except for the presence of Claims 1-10, 12-15 to inventions non-elected without traverse. Accordingly, Claims 1-10, 12-15 been cancelled.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37

Art Unit: 2872

CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel Claims 1-10, 12-15.

5. The following is an examiner's statement of reasons for allowance:

Claim 22 is allowable over the cited art of record for at least the reason that the cited art for record fails to teach or reasonably suggest an optical filter assembly including a multilayer thin film interference filter, originally formed on a substrate and released therefrom forming a freestanding filter to eliminate stresses therebetween, whereby the frame member applies stress to the multilayer interference filter during changes in temperature, thereby reducing a shift in the center wavelength transmitted by the multilayer interference filter. Claims 23-26, 29-32 are dependent on Claim 22, and hence are also allowable over the cited art of record for the same reasons that Claim 22 is allowable.

The cited art of record, particularly Fernandez et al. (U.S. Patent No. 5080739), Gasparian (U.S. Patent No. 4373775), and Mahlein et al. (U.S. Patent No. 4097126), either singly or in combination, fail to teach or reasonably suggest an optical filter assembly including a multilayer thin film interference filter, originally formed on a substrate and released therefrom forming a freestanding filter to eliminate stresses therebetween, whereby the frame member applies stress to the multilayer interference

filter during changes in temperature, thereby reducing a shift in the center wavelength transmitted by the multilayer interference filter. It is noted that even though the idea that the coefficient of thermal expansion of an optical element may be made different than that of the frame member surrounding it and that focal length tuning may be performed by application of heat on the frame member (See in particular the reference to Mahlein et al.), it would not be obvious to one skilled in the art to use this tuning mechanism to effect a reduction in the shift of the center wavelength transmitted by a multilayer interference filter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnel C. Lavarias whose telephone number is 571-272-2315. The examiner can normally be reached on M-F 8:30 AM - 5 PM EST.

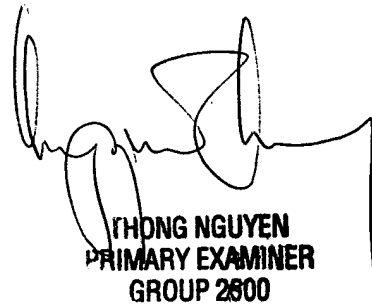

6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
